

MILLIONS AGAINST MEDICAL MANDATES

After two years of real-life data, we are no longer guessing about the issues with Covid-19 or the vaccines. We have the information. We have the numbers. WE NOW KNOW THAT...

THE COVID-19 VACCINES AND BOOSTER DO NOT WORK!

Around the world, leaders promised that SARS-CoV-2 vaccines would be a savior, allowing people to return to normal. More than a year later it is becoming apparent that these promises were hollow - or worse. The vaccines do not stop transmission of the virus and do not stop a person from becoming ill.

There is no way to prove, in any individual, that the course of illness is less severe if vaccinated. In fact, as shown below, some data shows the opposite to be true. As former NY Times reporter Alex Berenson notes, "mRNA Covid vaccinations and boosters need to stop worldwide while we figure out what is happening."

- The world's most mRNA vaccinated countries now have shockingly high Covid infection rates. Hospitalizations and deaths are rising fast too. The mRNA experiment needs to stop.
- Israel, one of most vaccinated countries in the world, sets new COVID case record.
- Concerning data from Scotland shows negative vaccine efficacy - the vaccine campaign is making COVID worse!
- Triple-Jabbed over-30s have higher infection rates than the unvaccinated, according to the UK data.
- The UK has fallen – 85% of Covid-19 deaths are among the vaccinated, child deaths have risen by 83% since they were offered the jab, Covid vaccine efficacy is negative 132%.
- No, vaccines don't reduce hospitalization according to the data.
- It's time to face reality. The data shows boosting doesn't work.
